# Forest Patcher Construction Plan

## Design Notes

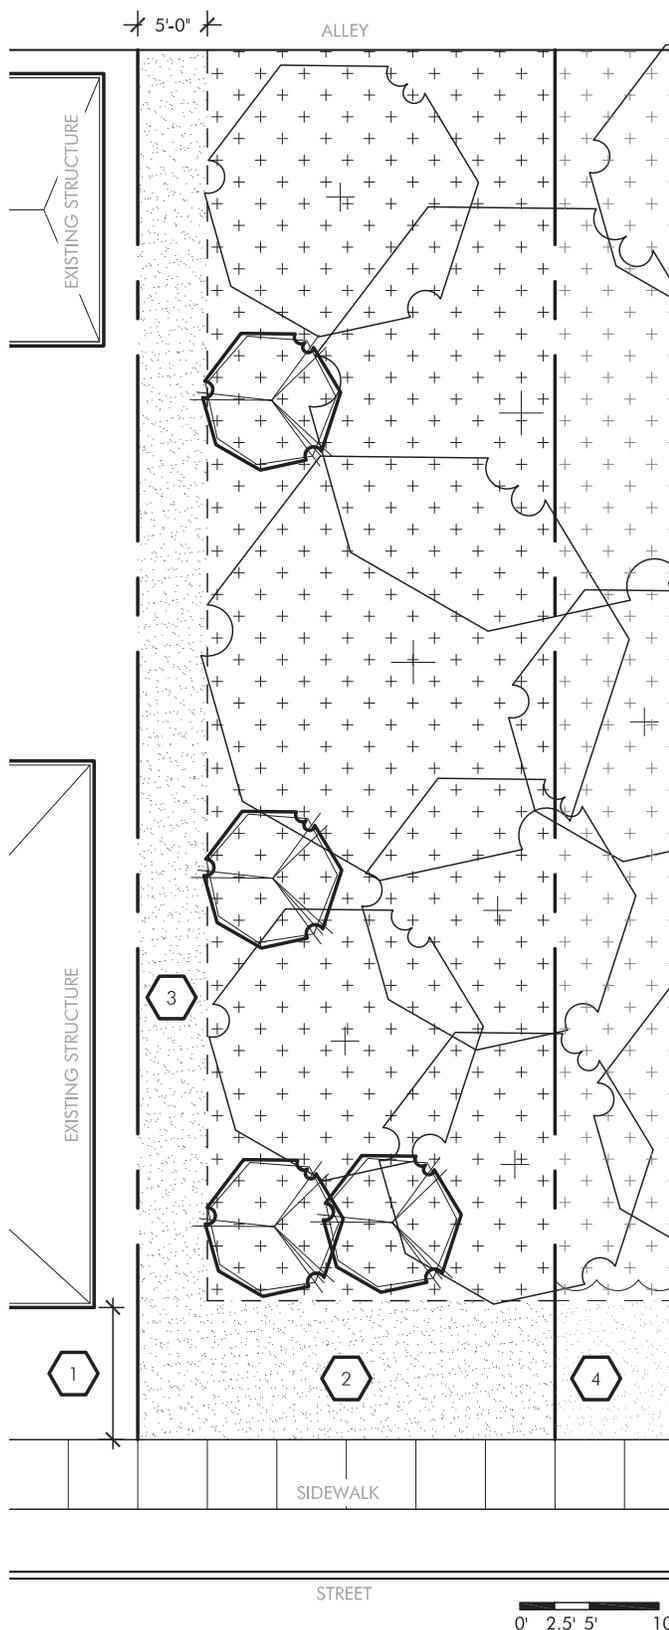

1.	It is the responsibility of the contractor to construct treatment in accordance with the published specifications of <a href="#">Detroit Future City Field Guide to Working with Lots</a> .  This information is available at <a href="http://www.DFC-lots.com">www.DFC-lots.com</a>
2.	Forest Patcher design intent is to maintain and strengthen existing woodland areas. Scope of work includes removal of understory brush and selective tree removal. Remove all plant material within setback zones as illustrated. See specifications for removal instructions.
4.	See attached recommended plants. Consult with owner for plants quantity, species and location prior to installation.
5.	Plan illustrates conceptual site layout. Actual site conditions will vary. Adjust site layout accordingly.

## Keyed Notes

1	Align planting area edge with adjacent structures as shown.
2	No woody shrubs to be planted in front setback zone. Plantings to be either low-maintenance turf or perennials growing 1' ht. or lower.
3	No woody shrubs to be planted in side setback zone(s). Plantings to be either low-maintenance turf or perennials growing 1' ht. or lower.
4	If design is to be implemented on multiple lots, maintain 10' setback from R.O.W. Provide 5' side setback as illustrated in keyed note 2.
